

LET'S MAKE A MODEL DRAGON BOAT!

HERE'S WHAT YOU'LL NEED:

- 1 Pouch of modeling clay
- Simple sculpting tools like a butter knife or toothpick
- Markers

HERE'S WHAT TO DO:

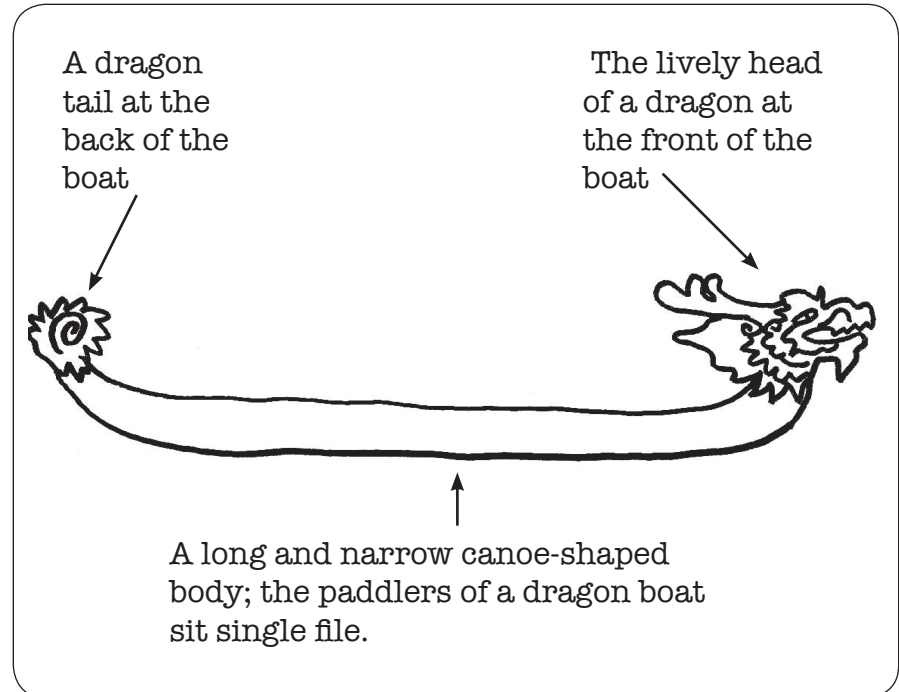

1. Get ideas for your dragon boat by looking at photos of real dragon boats.
2. Knead your modeling clay to soften it. Use your fingers to press the clay into a long canoe shape. Make a dragon head to attach to the front of your boat and a dragon tail to add to the back.
3. Use a butter knife, toothpick or any other sculpting tool you find at home to add details to your boat.
4. When you are finished shaping your boat, allow it to dry. Once it is firm, you can add more decorations using markers.

IMPORTANT: Do not put your model dragon boat in water! Your special boat is meant as a decoration only.

What Does a Dragon Boat Look Like?

Here are some helpful drawings to get you started in creating your own beautiful dragon boat.

The Basic Design of a Dragon Boat

Remember, dragon boats come in all shapes, sizes and styles, so don't be afraid to use your imagination to create your own unique model boat!
